ABOUT

Versatile ML Engineer and Backend Developer with expertise in deep learning and strong DevOps knowledge. Skilled in multiple programming languages and refactoring legacy codebases, passionate about AI research.

EDUCATION

B.Tech Electronics and Communications
GMR Institute of Technology, Andhra Pradesh

2015 - 2019

PROFESSIONAL EXPERIENCE

AI Resident - Lossfunk AI Residency
Lossfunk AI Residency (Remote)

April 2025 - May 2025

- Selected for Lossfunk, a 6-week intensive AI residency for builders and researchers (only 10 participants selected globally).
- Developed RASPID (Reasoning-Aware Steering with PID Control), a novel activation steering technique to reduce redundant reasoning tokens in LLMs.
- Conducted experiments on reasoning models like DeepSeek-R1-Distill-Qwen-1.5B with dynamic activation interventions, achieving 32% token reduction and improved reasoning accuracy on grade school math problems.

Associate Technical Architect - MLOps
Quantiphi Analytics, Bengaluru

Nov 2024 - Present

- Designed and implemented an AI agent system for automated replies for a major telecom company's sales chatbot.
- Experimented with LangGraph agent architectures to improve controllability and modularity in conversational flows.
- Revamped and automated the scheduled RAG data ingestion pipeline and Improved retrieval accuracy by 20%.
- Improved retriever latency by several folds via extensive code refactoring.

Senior Developer at Innovation & Development Labs
Musigma Business Solutions, Bengaluru

June 2019 - Nov 2024

- Led development of multiple high-impact projects in LLM operationalization, automated trading, and MLOps.
- Specialized in backend development, DevOps, and ML engineering across various domains.
- Received multiple recognitions including Impact Awards and Star Performer of the Team.

KEY PROJECTS

LLM Agent Platform

Dec 2023 - Nov 2024

Team Lead, ML Engineer, Backend Developer

- Designed and implemented a semi-autonomous data analysis platform powered by LLM Agents.
- Developed training strategies for LLM Agents via automatic prompt optimization and integrated Retrieval-Augmented Generation (RAG) support.
- Implemented evaluation for LLM Agents' results using an ensemble of locally hosted LLMs.
- Maintained a customized fork of Microsoft's Autogen framework.
- Successfully deployed for two major clients, assisted client teams in creating use cases.

High Velocity Trading Platform

2021 - Dec 2023

Team Lead, Backend Developer, DevOps

- Refactored backend code and migrated deployment from bare-metal to Kubernetes.
- Implemented automated hyperparameter search for ARIMA models.
- Rewrote legacy trade-signal generation from R to Scala using Akka framework.
- Enabled near real-time metric calculation and portfolio visualization.

Next-Gen Model Operationalization Platform

2019 - 2021

Backend Developer

- Developed automatic retraining pipelines for image classification models.
- Designed and implemented Java microservices for creating and serving Jupyter notebooks.
- Engineered a microservice for deploying ML models in a DAG structure with canary and blue-green deployment strategies.

RESEARCH PAPERS

Understanding Hidden Computations in Transformer Language Models

August 2024

Independent Researcher

- Conducted research to decode the "hidden" computations in transformer models during Chain of Thought (COT) reasoning.
- Investigated methods to enhance the faithfulness and internal mechanics of chain-of-thought reasoning in LLMs.

PERSONAL PROJECTS

AdvisorMatch

Nov 2024

Creator, Developer

- Built 'AdvisorMatch' a PhD advisor-matching tool, to help candidates find faculty advisors aligned with their research interests.
- Designed a similarity search mechanism that matches the user's research interests with the latest work of over 23,000 global faculty to recommend suitable matches.

SKILLS

Programming Languages: Scala, Python, Java, R

Machine Learning Frameworks: PyTorch, JAX

AWARDS & RECOGNITIONS

AI Alignment Awards

July 2023

www.alignmentawards.com

Winning entry for the "goal misgeneralization" track research proposal, selected among 118 entries in this research competition.

Honorable Mention

Mar 2022

Alignment Research Center

"Eliciting Latent Knowledge" is an open research problem in AI Safety. My proposal was one of the honorable mentions in this research competition.

SPOT and Impact awards

2019 - 2023

Musigma Business Solutions

Received six SPOT (Star Performer) awards and two Impact Awards at Musigma for exceptional contributions, DevOps skills, and LLM-Agent platform design.

Bronze Position

Feb 2021

Build-on-Redis Hackathon

Winning entry in the Build-on-Redis hackathon. Implemented a text2code search tool entirely on Redis Stack using CodeBERT model's embeddings for a private code repository.
